Subject: September 30 enrolment

About one month ago you were busy counting heads and completing the enrolment data for your school and / or school board. As you are well aware this is an important component and has a direct impact on your classification and consequently your salary.

It is officially referred to “A change in range” and Article 24 covers this topic as shown below.

Extracted from the June 2012-06 Regulation – currently in force

Division 2 Classification - Change in range

Article 24 - The range of positions shall be reviewed yearly. Any change in range resulting from the review shall take effect on 1 July of the current school year.

Change of a position to a Higher Range

Where a position moves up to a higher range as a result of an increase in student population applicable to him, the incumbent's salary in the position corresponding to his new class shall be determined under paragraph 1 of section 33.

Change of a position to a Lower Range

Where a position moves down to a lower range as a result of a decline in student population applicable to him, the incumbent's class and salary shall be maintained until the decline is 10% below the lower limit of the range that was applicable to the position.

Where a decline in student population is 10% below the lower limit that was applicable to the position, the incumbent's salary in the position corresponding to his new class shall be determined under paragraph 2 of section 33.
